Iowa Electric Cooperative Living magazine (ISSN: 2770-8683) is published monthly by the Iowa Association of Electric Cooperatives, a not-for-profit organization representing Iowa's member-owned local electric cooperatives. Association address: 8525 Douglas Ave., Suite 48, Des Moines, IA 50322-2992. The phrase **Iowa Electric Cooperative Living** is a mark registered within the state of Iowa to the Iowa Association of Electric Cooperatives. The magazine does not accept advertising.

Editorial Office
8525 Douglas Ave., Suite 48, Des Moines, IA 50322-2992. Telephone: 515-276-5350.

GROWING RELIABILITY THREATS

BY JIM MATHESON

American families and businesses expect the lights to stay on at a cost they can afford.

But that's no longer a guarantee. Nine states saw

rolling blackouts last December as the demand for electricity exceeded the available supply.

This is no longer a theoretical conversation. And unless policymakers change course, it's going to get worse.

Warnings and challenges mount

In May, the Environmental Protection Agency (EPA) proposed a rule to regulate power plant emissions. This proposal will further strain America's electric grid and undermine decades of work to reliably keep the lights on across the nation. It's just the latest instance of EPA failing to prioritize reliable electricity as a fundamental expectation of American consumers.

It shouldn't have to be this way. When you find yourself in a hole, the first thing to do is stop digging. But instead of putting down the shovel, EPA wants to bring in an excavator.

But don't just take my word for it. Warnings about the threat of reliability challenges have snowballed in recent months. The 2023 North American Electric Reliability Corporation (NERC) summer reliability assessment recently highlighted that more of the country is at risk of blackouts than last year. NERC says that the EPA proposal will accelerate the reliability challenges.

In May, several Federal Energy Regulatory Commission leaders warned the U.S. Senate about threats to reliable electricity. In March, Manu Asthana, who is the CEO of PJM Interconnection – a regional transmission organization that coordinates the movement of wholesale electricity in 13 states –

said that the regional transmission organization needed to slow the pace of generation retirements to avoid reliability problems by the end of the decade.

Voicing reliability concerns

America has a reliability problem. With the help of co-op leaders across the nation, the National Rural Electric Cooperative Association has been a leading voice in sounding the alarm on reliability. Today's energy decisions will determine if there are sufficient resources to keep the lights on tomorrow. Five issues are impacting the reliable delivery of electricity across the nation.

- 1 Increasing demand for electricity as other sectors of the economy are electrified.
- 2 Decreasing electricity supply due to the disorderly retirement and insufficient replacement of existing generation.
- 3 Permitting delays that prevent new electric infrastructure from being built and connected to the grid.

4 Supply chain challenges.

5 Problems with natural gas availability.

Commitment to member-consumers

None of these challenges will be easy to address, but we can start by asking ourselves these questions:

- Is this what America is supposed to be?
- Should the threat of rolling blackouts be a permanent facet of U.S. energy policy?

The answer to both of those questions is a resounding no for electric co-ops and the communities we serve.

The long-term solution requires policymakers and regulators to recognize the need for time, technology development and new transmission infrastructure. These are the essential ingredients for an energy future that prioritizes reliable electricity for all consumers, including the 42 million Americans served by electric cooperatives.

Jim Matheson is the CEO of the National Rural Electric Cooperative Association.

EDITOR'S CHOICE CONTEST

Win a grilling package!

July is National Grilling Month! To celebrate, we're giving away a beef bundle, including \$50 in beef certificates, a cast iron skillet and additional summer grilling essentials, courtesy of the Iowa Beef Industry Council.

Visit our website and win!

Enter this month's contest by visiting www.ieclmagazine.com no later than July 31. You must be a member of one of Iowa's electric cooperatives to win. There's no obligation associated with entering, we don't share entrant information with anyone and multiple entries from the same account will be disqualified. The winner of the \$100 local nursery gift card from the May issue was Phillip Boehnke, Prairie Energy Cooperative.

ENTER ONLINE BY JULY 31!

ELECTRIC CO-OPS GO THE EXTRA MILE FOR YOU

Electric co-ops serve **8 consumers** per mile of power lines. Other electric utilities serve **32 consumers** per mile. Even though we serve fewer consumers along the lines, that won't stop us from going the extra mile for you, our members we're proud to serve.

WELCOME TO FRANKLIN REC'S NEW MONTHLY NEWSLETTER FORMAT

BY GARRETT THOMPSON

Beginning with this issue of *Iowa Electric Cooperative Living*, you will now find our newsletter within the pages of this magazine. Instead of receiving our monthly

newsletter in the mail, Franklin REC announcements and articles will appear on Pages 4-5 (and occasionally Pages 12-13) of each issue. We will deliver the same valuable, timely content you've come to expect from Franklin REC in a new full-color format that is customized for you, our member-owners.

Bringing this content into the magazine not only updates the layout of our monthly message but also allows us to gain efficiencies with printing and postage. Sending this publication each month is an

important way to educate and inform members. Timely information about energy efficiency, safety, local news about rural economic development, and emerging trends and technologies in the electric industry is a prudent financial investment to keep our membership informed and co-op strong. We have an obligation to help you use energy wisely and safely. What's in your best interest is in our best interest.

We continuously work to be a trusted local energy partner and source of honest information – and this publication is just one way we strive to serve you. Thank you for supporting Franklin REC and your interest in being an educated and informed member-owner. We look forward to sharing our new custom edition of *Iowa Electric Cooperative Living* magazine with you each month.

Garrett Thompson is the CEO of Franklin REC.

BOARD PRESIDENT EARNS DIRECTOR GOLD CERTIFICATE

At the May Franklin REC board of directors meeting, President Gordon Greimann received national recognition for continuing his education and commitment to our cooperative. The ever-changing business environment has imposed new demands on electric cooperative directors, requiring increased knowledge of changes in the electric utility business, new governance skills and a solid knowledge of the cooperative business model.

Greimann adds to his cooperative certifications as he completed the Director Gold program with National Rural Electric Cooperative Association (NRECA).

To receive this certification, the director must have previously completed the Credentialed Cooperative Director and Board Leadership Certificate programs through NRECA. To maintain the gold certification, Greimann will need to continue advancing his electric cooperative knowledge through a series of courses.

Greimann has served on Franklin REC's board of directors for 27 years. He is also the elected representative of District 6 on the Iowa Association of Electric Cooperatives board of directors, acting on behalf of Franklin REC and five additional cooperatives.

CRIME STOPPERS

If you see suspicious activity, please call.

Provide an anonymous tip and receive a cash reward if the perpetrators are caught.

Help us keep our electric system safe.

YOU CAN HELP PREVENT COPPER THEFT!

FROM YOUR BOARD ROOM

During the May board meeting, Franklin REC directors:

- Approved work orders and special equipment capitalization of \$16,090.21
- Approved a contribution to Cooperative Finance Corporation (CFC) Integrity Fund
- Selected voting and alternate delegates for the CFC Forum
- Selected voting and alternate delegates for National Rural Electric Cooperative Association meeting
- Approved the Iowa Association of Electric Cooperatives 2023/2024 Safety Gold Fee
- Approved a donation request from Rockwell Century Homes, Inc
- Approved 2022 patronage allocation
- Approved patronage retirements
- Approved a contribution to Cooperative Family Fund

MEET IOWA'S ATTORNEY GENERAL

BY ANN FOSTER THELEN

Editor's Note: As a non-partisan publication, we profile government officials from time to time to help our readers get to know these important Iowans and to understand how their roles impact rural Iowa.

In November 2022, Iowans elected Brenna Bird as their next Attorney General – the first Republican to hold the office

since 1979. Before becoming Iowa Attorney General in January 2023, Bird served as a prosecutor for six years, first as the Fremont County Attorney and then since 2018 as the Guthrie County Attorney.

Born and raised on a farm in Guthrie County, where she was homeschooled, Bird graduated from Drake University and received her J.D. from the University of Chicago Law School.

We sat down with Bird in June to learn more about her perspectives and priorities on various topics in her new role serving Iowans.

Q: Tell our readers more about your background and family.

I grew up east of Dexter, and we had corn, soybeans, cattle and farrow-to-finish pigs. My husband, son (who is 6 years old) and I live on what was once my grandpa's farm – where my dad grew up – and in the house my grandpa built in rural Dexter.

My husband Bob is an Iraq War veteran. He is also a lawyer and works in the Iowa State Senate. Over the years, my legal career has included working in private practice, in Congress in Washington, D.C., as legal counsel for Gov. Branstad and then Lieutenant Gov. Reynolds. I've served as the county attorney in Audubon, Fremont and Guthrie counties.

Q: Over the years, how have you been involved in your community/state or other activities? What are your hobbies?

Beyond professionally, one of the ways I've been most involved in the

community is through our church and the local activities that our parish gets involved in. The strength of our rural communities is one of Iowa's best assets. We are good at working together and solving problems. I enjoy reading, cooking, gardening, quilting, bicycling and spending time with family.

Q: How has agriculture shaped who you are today?

My family has been involved in agriculture for generations. In fact, my brother is a seventh-generation farmer. Growing up in agriculture taught me to stick to things even when they get tough and keep trying and working hard.

Like many Iowa families, we learned through the farm crisis that people matter more than possessions. From firsthand experience, I know that Iowa farmers care more about the land than anyone else and support good conservation practices.

Q: What are some topics that you are passionate about that impact rural Iowa/lowans?

One area is pushing back against the federal government in court when they go too far with federal overreach. An important example for Iowa is the Waters of the U.S. rule, which would allow the Environmental Protection Agency to control 97% of Iowa farm ground and other lands. We've challenged the rule and have received some favorable rulings to stop it, but we're still litigating that through court. That's very important because it could change agriculture in rural Iowa as we know it. We need to keep decision-making local and out of D.C.

I'm also passionate about supporting and maintaining strong law enforcement. An alarming trend is the infiltration of drugs into rural Iowa. In every county in the state, it's important to keep our communities safe.

Q: As a member of Guthrie County REC, what are your thoughts/perspectives on the cooperative business model?

The cooperative business model works well. Initially, electric cooperatives brought power to rural Iowa, including where I live. It's essential to have affordable and reliable electricity. Because of its local ownership structure, cooperatives excel with customer service, responsiveness and community engagement. The co-op business model is even more relevant today than ever before.

Q: What personal and professional accomplishments are you most proud of?

Personally, it's being a wife and mom. I worked full-time to pay for college. I learned a lot serving in different roles in the Governor's office and Congress. Then, starting my law firm while also working as a county attorney.

Regarding my accomplishments as a prosecutor, I think the best part of the job was working with law enforcement because they're heroes with good hearts. People don't see all the things that law enforcement does daily and the compassion and bravery they bring to the job. Working to enforce the law to keep our communities safe and helping crime victims is rewarding.

Q: What excites you the most about being Iowa's Attorney General?

Having the opportunity to make Iowa safer, support our law enforcement and push back against the federal government when they go too far.

Q: What is another top priority that you are working on?

We're here to serve lowans. If someone falls victim to a scam or thinks something might be suspicious, we want them to reach out to our office.

Last year, we were contacted by a woman who received a scam call and was told that she had a fraudulent Amazon charge for thousands of dollars on her account. The scammer convinced her they would help cancel

the payment. They claimed her account showed unusual activity in other states, that she had become a victim of ID theft, and that her information was used to commit a crime. The scammer impersonated law enforcement and informed her to protect her assets, she needed to send a box with \$20,000 in cash to California. The day after she shipped the money, she realized she had been scammed and contacted the Iowa Attorney General's office. Our team was able to stop the shipment and return the money to this woman.

Ann Foster Thelen is the editor of Iowa Electric Cooperative Living.

See Page 14 for tips on protecting yourself against utility scams.

Brenna Bird with her husband Bob and their son.

Vegetable

RECIPES

for summer

SWEET AND SOUR GREEN BEANS

- 4 slices of bacon
- 3 tablespoons brown sugar
- flour, optional
- 3 tablespoons vinegar
- 1 pint green beans

Fry bacon, drain and crumble. Put brown sugar in pan, stir in flour thickener if desired. Add bacon, vinegar and beans and heat through. *Serves 2*

**Allyson Bailey • Hamilton
Chariton Valley Electric Cooperative, Inc.**

MICROWAVE SUCCOTASH

- 1 16-ounce bag frozen corn
- 1 16-ounce bag frozen lima beans
- ¼ cup water
- 1 14.5-ounce can diced tomatoes
- ½ teaspoon garlic powder
- ¼ teaspoon smoked paprika
- ¼ teaspoon thyme, dried
- 1 teaspoon parsley, dried
- 1 teaspoon salt
- ⅓ cup sweet onion, finely chopped
- 1 tablespoon butter

In a 2.5-quart microwave-safe bowl with lid, mix corn, lima beans and water. Microwave on high for 10 minutes. Let bowl sit in microwave covered. In a separate bowl, combine tomatoes, garlic powder, paprika, thyme, parsley and salt. Mix well and set aside. Sauté onions in butter until clear. Add to bowl of tomatoes and spices, mix well. Combine tomato mixture with corn and lima beans. Thoroughly stir together. Microwave on high for 2 minutes or until hot. *Serves 6*

**Jacque Minikus • Pisgah
Harrison County Rural Electric Cooperative**

EASY SCALLOPED POTATOES

- 2½ cups milk, heated
- 3 tablespoons flour
- 1½ teaspoons salt
- 6 medium potatoes, peeled and thinly sliced
- 3 tablespoons butter, plus enough to coat casserole dish
- pepper, optional

Stir the milk, flour and salt together. Layer in a buttered casserole dish alternating potatoes and milk mixture. Top with 3 tablespoons butter and season with pepper, if desired. Bake at 350 degrees F for 60-75 minutes or until the potatoes are tender. *Serves 8-10*

**Elinor Moeller • Tripoli
Butler County Rural Electric Cooperative**

LOTTA (LOW-TAH) FINNISH VEGGIE CASSEROLE

- 5 potatoes, sliced
- 4 carrots, sliced
- salt, to taste
- pepper, to taste
- 1 onion, sliced
- 1 beet, sliced
- ½ pound salt pork, preferably frozen
- ⅓ cup water

In a medium-sized roaster or Dutch oven, place a layer of potatoes followed by a layer of carrots. Season with salt and pepper to taste. Add a layer of onions followed by a layer of beets, salt and pepper. Repeat the vegetable layers one more time. Slice salt pork ¼-inch thick and approximately ½-inch wide, frozen pork is easier to cut. Place salt pork on top of vegetables and add water. Place under the broiler to cook salt pork until crispy brown. Cover roaster and cook at 400 degrees F for 50 minutes. *Serves 6*

Michele Dirks • George • Lyon Rural Electric Cooperative

INFINITY CABBAGE SALAD

- ¼ cabbage, shredded
- 1 cucumber, thinly sliced, optional
- ½ carrot, thinly sliced, optional salt, to taste
- 1 tablespoon soy sauce
- 1 teaspoon sugar
- 2 teaspoons apple cider vinegar
- 2 teaspoons sesame oil
- 1 tablespoon sesame dressing, optional
- 1 teaspoon sesame seeds

Put the shredded cabbage in a colander. If desired, add cucumber and carrots. Sprinkle with salt, mix well. Set aside for 5-10 minutes. Meanwhile, create a dressing by mixing soy sauce, sugar, apple cider vinegar and sesame oil. Add sesame dressing, if desired. Squeeze vegetables to drain excess water. Pour dressing over vegetables and sprinkle with sesame seeds. *Serves 3*

Erina Westphal • Guthrie Center
Guthrie County Rural Electric Cooperative Association

EGGPLANT CASSEROLE

- 1 small eggplant
- 3 tablespoons cooking oil salt, to taste pepper, to taste
- 1 medium onion, chopped
- 1 small green pepper, chopped
- 2 medium tomatoes, sliced medium thickness
- ¼ cup American cheese, grated

Peel eggplant and slice about ⅜- to ½-inch thick. Cut slices in half. In a large frying pan, heat oil until starting to smoke. Place eggplant in hot oil and brown each side. Season with salt and pepper to taste. In a 2-quart baking dish, alternate layers of eggplant, onion, green pepper and tomatoes. Cover and bake at 375 degrees F for 50 minutes. Remove cover and sprinkle grated cheese on top. Return to oven and bake uncovered until cheese is melted and browned. *Serves 4*

Greg Flugum • Forest City
Prairie Energy Cooperative

GOOD CARROTS

- 8 cups carrots, peeled and sliced
- ¼ cup onion, chopped
- 1 cup plus 4 tablespoons butter, divided
- 1 pound Velveeta
- ½ cup brown sugar
- 2 cups crackers, crushed

Steam and drain carrots and onions. Place in 9x13-inch pan. Melt 1 cup butter with Velveeta. Mix in brown sugar and pour over carrots. Mix crackers and 4 tablespoons melted butter, sprinkle over top. Bake at 350 degrees F for 20-25 minutes. *Serves 6*

Lizzy Hartter • Rock Rapids
Lyon Rural Electric Cooperative

ONION PIE

- 1 cup soda crackers, crushed
- ¼ cup margarine, melted
- 2 cups onion, sliced
- 2 tablespoons margarine
- ¾ cup milk
- 2 eggs, beaten
- ¾ teaspoon salt pepper, to taste
- ¼ cup sharp cheddar cheese, shredded
- parsley, to taste, chopped

Mix crackers and ¼ cup melted margarine. Press into an 8-inch pie pan on bottom and up the sides. Cook onions in 2 tablespoons margarine until tender, not brown. Place onions in pie pan. Combine milk, eggs, salt and pepper, then pour over onions. Sprinkle with cheese and a little chopped parsley. Bake at 350 degrees F for 30 minutes, until custard is set. Serve hot. *Serves 8*

Truman Nester • Rock Rapids • Lyon Rural Electric Cooperative

BAKED ZUCCHINI CASSEROLE

- 1 pound ground beef
- ¼ cup onion, chopped
- ½ cup green pepper, chopped
- 1 cup cracker crumbs salt, to taste pepper, to taste
- 1 can cream of mushroom soup
- 2 eggs, beaten
- 1 large zucchini, cubed (or 2 small) bread crumbs for topping

Brown beef and onion. In large bowl, mix beef and onion with green pepper, cracker crumbs, salt, pepper, soup, eggs and zucchini. Place mixture in a greased 9x13-inch pan. Top with bread crumbs and bake at 350 degrees F for 35-40 minutes.

A TRIP OF A LIFETIME DELORES FAGLE THOM RECALLS EXPERIENCE ON 1958 YOUTH TOUR

BY JENNIFER ACHENBACH

Sixty-five years ago, Delores (Reed) Fagle Thom stepped on a bus headed to Washington, D.C., for the first-annual Rural Electric Co-op Youth Tour.

It was a trip that would leave a lasting impression on the recent high school graduate.

At the time, Delores was working at the Iowa State University Extension Office in Independence. As a member of the Buchanan County Rural Electric Cooperative, her boss suggested she complete the application for the tour, writing an essay about why she wanted to be chosen. She was one of the over 30 participants from Iowa selected to go to D.C. in 1958. As a recent Independence High School graduate, Delores was engaged to Dwaine Fagle. In her words, she thought that if she was going to go on a trip like this, she better go before she was married.

On June 14, Delores got on a bus headed to D.C., her first time visiting the nation's capital. The group spent the night in Toledo, Ohio, before arriving in D.C. the next evening. They stayed at the Arva Motor Hotel in Arlington, Virginia.

Impactful lineup of tours and conversations

The first day of the trip, the group had breakfast with members of the Iowa Congressional Delegation, followed by a tour of the U.S. Capitol, led by Sen. Thomas Martin. That was followed by a tour of the Library of Congress, visiting both the House of Representatives and Senate, as well as the Supreme Court Building. Delores recalls the time she spent visiting with her local delegates, as well as posing as a group on the Capitol steps.

On June 17, participants visited the National Rural Electric Cooperative Association (NRECA) building, followed

by a visit to the Bureau of Printing and Engraving and the Department of Justice.

Activities the next day included touring the Rural Electrification Administration headquarters at the United States Department of Agriculture (USDA), viewing the Washington Cathedral and touring the USDA Research Center in Beltsville, Maryland.

June 19 holds a special place in Delores' memory. That was the day participants got a special tour of the White House.

After the White House tour, the group visited the Washington Monument, including an elevator ride to the top. Next, they

went to the Smithsonian Institute and finished the night with a trip to Glen Echo Amusement Park. On the final full day of the trip, they toured Arlington National Cemetery, Tomb of the Unknown Soldier and Lee's Mansion, then concluded the visit with a tour of Washington's home at Mt. Vernon.

After five days of learning about government, the group got back on the bus to Iowa on Saturday, June 21. They spent the night in Chicago. Delores recalls feeling a little scared as their hotel room didn't have a lock on the door.

Despite the full schedule of activities, there was also a lot of fun and bonding with her fellow participants.

"We stayed in a motel room with four of us to a room. We filled the bathtub with ice cubes and put watermelon in it. We invited a few people to our room, and we had a watermelon treat," she remembers.

When she returned to Iowa following the tour, Delores presented what she'd learned to her co-op.

The next chapters of life

What started as a trip before settling down turned into an experience that shaped the rest of her life. Delores and Dwaine got married the following year. They lived in Independence, then Dewar and Sumner, before settling onto their farmstead three miles west of Fayette. There, the couple raised seven children while operating their dairy farm.

In 1986, Delores decided it was time to go to school and pursue her passion. She started taking accounting classes at Northeast Iowa Community

College (NICC) in Calmar. She finished her degree in 1987 and opened Delores Tax and Accounting. For over 30 years, Delores has built her business, at times with more than 200 tax clients a year, in addition to her accounting jobs.

"I just love it," she says, noting she now has cut back on her tax work but stays busy year-round with accounting. She was recognized by the governor for 25 years of work in 2013. She also was named a 2017 NICC Alumni Shining Star.

Dwaine passed away in 1996 from cancer. After a second marriage, Delores found love with her high school sweetheart, Bill Thom. Delores had reached out to Bill after the death of his wife. Six years later, Bill contacted Delores and they struck up a relationship. The two married. They later divorced but remain in touch today. Delores now resides in Fayette, just three miles from where she and Dwaine farmed.

Fond memories and advice for future participants

Although it's been well over half a century since Delores was on the Youth Tour, she still has fond memories of the trip.

Delores is excited for future Youth Tour participants to experience the thrills she had.

"Make it a learning experience because there's a lot to learn, but still enjoy the time that you're there," she says. "It was a good experience for me, a good learning experience."

Jennifer Achenbach is the manager of marketing and communications for Allamakee Clayton Electric Cooperative.

Delores (Reed) Fagle Thom is pictured with a photo from her Youth Tour experience in 1958.

Vintage photos from the 1958 Youth Tour.

SOLAR COMPANY SALES PITCH

Have you recently been bombarded by a solar company enticing you with the benefits of installing solar panels at your location? Franklin REC understands that you may be unsure of questions to ask when these organizations arrive on your doorstep. We are here to guide you through all the unknowns.

Here are 10 questions to ask before entertaining a sales presentation:

- 1 How long have you been in business?
- 2 Are you licensed to do business in Iowa?
- 3 Who will do the installation at my site? Are they employees or subcontractors? If you involve subcontractors, do they work with several other employers, too? Have these subcontractors worked on many of your installations?
- 4 What training have you and your installers had, and what, if any, certifications do you and your installers hold? Do you have an installer with a Master Electrician license, and is there an installer on your team licensed to install solar?
- 5 Does your company carry these types of insurance: general liability for at least \$1 million, professional liability, workers compensation?
- 6 What tax credits, rebates and other incentives will this installation qualify for? Who files the paperwork for any/all incentives?
- 7 What will the payback period be? *If they promise no electric bills, this is a major red flag!*
- 8 How and when will you involve staff from my electric cooperative in the installation? Do you have experience interconnecting with utility grids?
- 9 Will permits be needed for this installation? Who obtains them and pays any permit-related fees?
- 10 Is it possible the installation may cause my roof to leak? If so, does your company take responsibility for the necessary repairs?

If you are interested in renewable energy at your service location, please contact Franklin REC.

LOWER COST FOR COMMUNITY SOLAR SUBSCRIPTIONS

Are you considering solar but don't have the space or means to install at your location?

Join Franklin REC's community solar program and leave the logistics to us. Recently, Franklin REC's solar subscription price decreased to \$532 per panel. The cooperative's community solar array allows you, our member, to receive the benefits of solar energy without the worry of installation, maintenance or insurance costs.

The solar array is located outside of Franklin REC's office on Highway 65, north of Hampton. It is maintained and insured by the cooperative, with no extra expense to the subscriber. The array consists of 508 modules, and each module is 350 watts, producing approximately 380 kilowatt-hours of electricity annually. The energy produced is distributed onto the power grid and participating subscribers receive a monthly bill credit. These bill credits help lower subscribers' energy bills until the year 2042.

Interested in learning more about the community solar program? Fill out this slip and return to Franklin REC to have a representative contact you. Or you can call our office at 641-456-2557 to learn more.

HANDS-ON TRAINING CREATES A STRONG LINE CREW AND NEW INSIGHTS

Franklin REC Apprentice Linemen Austin Neff and Ben Waltersdorf attended

the Iowa Association of Electric Cooperatives' (IAEC) two-day Overhead Workshop presented by IAEC safety coordinators.

During the workshop, Neff and Waltersdorf participated in simulated, controlled scenarios with each session replicating events that may occur on any given day. The linemen were instructed on techniques to repair downed conductors and change a three-phase structure with the use of a three-phase lifting tree. They worked together as a team to replace a three-phase tap with sectionalizing devices.

“The best part about overhead school is always the camaraderie. You may not

know anybody, but within 10 minutes it feels like you have known each other forever,” says Neff. “It’s also nice to see the different ways other co-ops go about day-to-day work. You may think the way you do something is best but could learn a more efficient way to do something.”

Education and training is a core principle of Franklin REC. We invest in our employees’ training to ensure the cooperative provides high-quality service to our member-owners.

STRONG POLES, STRONG RELIABILITY

The backbone of Franklin REC’s reliable distribution system is the utility poles lining the miles of Iowa’s countryside. Strong, sturdy utility poles ensure a reliable distribution system, which is why we routinely inspect the integrity of our poles.

Throughout the year, Franklin REC crews examine poles for possible decay caused by exposure to the elements. Occasionally, poles need to be replaced for other reasons besides decay and old age, such as weather disasters, power line relocation and accidents. Typically, a standard wooden distribution pole is expected to last more than 50 years.

To improve our service reliability, Franklin REC annually contracts STAR Energy, an independent third-party company, to pole test and treat approximately 1,400 poles.

With the results we receive from STAR Energy, the cooperative replaces the deteriorated, rejected poles while the other tested poles receive a liquid treatment, significantly extending the life of the utility pole. Franklin REC’s annual replacement rate is typically 2% or lower, indicating the strength of the cooperative’s system.

Late summer into fall, you will see STAR Energy working in a section of our territory. The testers will have Franklin REC contractor magnets located on the side of the vehicle. When possible, Franklin REC will communicate when and where pole testing crews will be working.

If you have questions or concerns regarding the work they are completing, please contact Franklin REC.

PROMOTED TO FIRST CLASS LINEMAN

In conjunction with celebrating three years at Franklin REC, lineman Cole Marzen has been promoted to first

class lineman. After completing years of training, hours of line work and many tests, Marzen passed all eight

levels of training to become a first class lineman. With this promotion, he will be able to work on energized power lines with a trained ground spotter, guide fellow apprentice linemen through procedures and lead a crew at the work site.

Congratulations to First Class Lineman Marzen!

PROTECT YOURSELF AGAINST UTILITY SCAMS

“Your electric bill is past due, and we will cut off power to your home in the next hour if you don’t pay us over the phone immediately!”

Have you ever received a threatening call like this from someone claiming to be from your local electric cooperative? Would you know what to do if you received a call like this?

No matter the season, scammers frequently target consumers, and members of Iowa’s electric cooperatives are not immune. Phone scammers often appear to be calling from local numbers and claim to be from the local electric cooperative. Sometimes, the calls include prerecorded messages. In almost all the calls, the scammers threaten the innocent person on the other end of the line, demanding immediate payment to prevent disconnection of electric service.

Your local electric co-op will never contact you out of the blue to demand immediate payment or threaten immediate disconnection. If you receive a suspicious call, text or email from someone claiming to be from the co-op, please contact your electric co-op office directly by using the phone number on a recent bill or on the co-op’s website to verify the communication. The best

defense against a utility scammer is an educated consumer; follow these tips from Utilities United Against Scams to protect yourself from a potential scam.

1 Protect personal information

Never provide or confirm personal information (Social Security number, date of birth) or financial information (banking account information, debit or credit card information) to anyone initiating contact with you and claiming to be from your local electric co-op. Never give out information or provide any payment type to any callers or unexpected individual(s) appearing at your door claiming to represent your co-op. Your local co-op will already have your relevant personal and account information.

2 Take your time

Do not be rushed. If you receive a call, text, email or visitor saying you have to pay your bill immediately to avoid disconnection, tell them you would like to verify that they are a legitimate co-op representative by calling a verified number for the local co-op office. Beware if a representative exhibits impatience, annoyance or anger when you question their authority. While a scammer will

discourage you from hanging up and calling the number on your utility bill, a real co-op representative will encourage you to do so for your own peace of mind.

3 Always ask questions

Ask the person contacting you to provide you with your account number, your last payment amount, date of payment and their employee identification number. If the individual is a legitimate utility representative, this information will be readily accessible. If not, hang up or shut the door, and call your utility directly to report the suspicious activity.

4 Contact your utility directly

If you receive a suspicious call or visit, please contact the local police and your electric co-op immediately. Share details that the scammer told you which might aid in a possible criminal investigation.

For more information on protecting yourself against various scams, visit the Iowa Attorney General’s website at www.iowaattorneygeneral.gov and click Consumer Tips & Information under the FOR CONSUMERS tab.

SCOTCHEROOS – AN IOWA DELICACY

BY DARCY DOUGHERTY MAULSBY

One of the highlights of summer events is getting to sample all the tasty, homemade treats at picnics, potlucks, parties and more. Iowans are masters of making these informal meals memorable.

When I attended a local high school graduate's reception in May, I couldn't believe my good fortune. At the end of the buffet line, there was a beautiful sight, sure to warm the heart of an Iowan – a huge tray of homemade scotcheroos, all cut into generous portions.

Since it's important to eat a balanced diet, I put a grilled hamburger on one side of my plate and a big scotcheroo on the other side.

I've been a scotcheroo fan since I was a kid. Well into adulthood, I assumed everyone knew about scotcheroos and loved them. After I published my book "A Culinary History of Iowa," I discovered that a surprising number of non-Iowans have never heard of these delicacies. Say it isn't so! It's hard to imagine life without this incredible concoction of cereal, chocolate, butterscotch and peanut butter that's fun to say (doesn't "scotcheroo" sound like a fancy dog?) and even more fun to create.

A convenient history

Occasionally, a member of the media asks to interview me about the origins of the famed scotcheroo. At best, the history is unclear. Some reports say the recipe made its first appearance on the side of Rice Krispies® boxes in the mid-1960s, although there's no definitive answer about who invented scotcheroos – or where.

While some food snobs might sneer at something based on convenience foods, let's take a step back to when scotcheroos first hit the culinary scene. I think of the Iowa home cooks I've interviewed through the years, especially those who remember how popular "modern" convenience foods

were in the 1950s, 1960s and 1970s. At that time, processed, time-saving foods were all the rage. Serving these types of foods was a sign you were on the cutting edge. It would have been trendier to bring a plate of scotcheroos to a party than a freshly made rhubarb crisp or apple pie.

Through the years, the Midwest has become the epicenter of scotcheroo enjoyment, and I, for one, am grateful.

Scotcheroos are a riff on Rice Krispies Treats, minus the marshmallows. This connection is a nice touch, since an Iowan helped create Rice Krispies Treats. After Mildred Ghrist Day earned her degree in home economics from Iowa State University, she landed a job with the Kellogg's cereal company. By 1939, Mildred and a co-worker invented what we know today as Rice Krispies Treats.

Simple goodness that stands apart

Some say scotcheroos are the Cadillac of Rice Krispies Treats. Even though they incorporate a few great twists, including peanut butter, melted

chocolate and butterscotch chips, scotcheroos don't really taste peanut buttery, nor do they taste quite like butterscotch. More than the sum of their parts, scotcheroos are chewy, crispy and downright addictive.

It's no wonder scotcheroo recipes often turn up in Iowa church cookbooks and community cookbooks – the places where people showcase their culinary "A game." These books abound with proven, practical recipes, meaning you can find most ingredients, if not all, at the local grocery store or your kitchen pantry. The simplicity of scotcheroo ingredients is just one more reason to love them.

Next time you need to bring treats to a picnic or potluck, just whip up a batch of scotcheroos. (Hey, I even learned recently that they freeze well if you want to make them ahead of time.) You're sure to be the hit of the party.

Darcy Dougherty Maulsby lives near her family's Century Farm northwest of Lake City. Visit her at www.darcymaulsby.com.
